## Media Release

4 November 2011

### **Aussie Racing Cars announce 2012 championship opener**

Australia's largest motor racing category - the FW1 Aussie Racing Cars are set to commence the 2012 championship on the streets of Adelaide at Australia's largest motor sports festival, the Clipsal 500.

"The Clipsal 500 event is one of the great events on the Australian motorsports calendar and we are really excited to be commencing our 2012 championship on the streets of Adelaide . The ultra fast pocket rockets suit the famous city street circuit perfectly and we are expecting a capacity grid of over 45 cars for the event so the on-track action will be awesome!" said Aussie Racing Cars category manager, Brad Ward.

Aussie Racing Cars are half size caricature versions of V8 Ford falcons, Holden commodore's and Toyota TRD Aurion's. They are purpose built rear wheel drive race cars powered by a YAMAHA 1.2 litre, 125 horsepower twin cam engine with sequential gear box which scream to 11,500 RPM!

Standing just on a meter high, the cars are small but their performance is breathtaking. 0-100 Kph is achieved in just over 4 seconds and the top speed is in excess of 230 kph.

Not only is Aussie Racing Cars known for the amazing high speed action but now it has glamour as well. Part time model and former Miss Summernats winner Hayley Swanson will be back on track at the 2012 Clipsal 500 Adelaide driving her Hooters Australia Aussie Racing Car.

The 2012 Championship will be contested over 7 rounds racing at Australia's largest motorsports events including the Clipsal 500 Adelaide and Mount Panorama Bathurst.
